

Looking for a great way to help create that custom exhaust system, but want the durability of 409S stainless steel as well? Flowmaster's U-Fit Dual Kit is a universal package that contains enough components to fabricate a header-back mandrel bent dual exhaust system on nearly any street rod, muscle car or pickup. The slip-fit kit contains twelve pieces of 2.25" diameter tubing in carefully selected bend angle configurations and four additional 2.0" diameter components for a crossover pipe fabrication, so you can create a custom tailored system for even the most demanding vehicle project. Constructed from durable 409S stainless steel, it delivers the type of durability builders expect and is backed by a limited lifetime warranty.

- **Makes fabricating a custom mandrel bent exhaust system easy.**
- **Universal design fits nearly any dual exhaust application.**
- **Durable 409S stainless steel material.**
- **Mandrel bent for maximum performance.**
- **Made in USA.**
