

Flowmaster is pleased to introduce this new addition to our line of 409S stainless steel products. This new dual tailpipe set is for 1964-1972 GM A-Body cars, including the Chevelle, GTO, Skylark and Cutlass, and includes a pair of 2.5" diameter, mandrel-bent tailpipes. Manufactured in the USA, the pipes are designed for use with offset-inlet/center-outlet mufflers, and exit straight out the rear of the vehicle. Like all Flowmaster 409S stainless steel products, these pipes are built to last and are backed by a limited lifetime warranty.

- **Stainless Steel Construction**
- **Mandrel Bent for Maximum Flow.**
- **Follows Factory Routing.**
- **Limited Lifetime Warranty**
