

NEW PRODUCT RELEASE

Flowmaster is proud to introduce our new Force II system for 2004–2008 V8 F150's. Featuring high-quality heavy gauge 409S stainless steel materials and developed for maximum efficiency and performance. This system uses the patented Super 50 Series muffler, which offers a moderate exterior sound level while maintaining a mild interior tone. Included with this bolt-on system is the 3.0" inlet pipe and dual 2.50" mandrel-bent tailpipes, which can be installed either straight out under the bumper or out behind each rear tire. Also included is all the hardware necessary for installation, along with detailed step-by-step instructions. Polished, 3.0" diameter Flowmaster-embossed tips finish the system, giving the F150 that classic performance look. As with all Flowmaster 409S stainless products, this kit includes our limited lifetime warranty, for long term security.

- **409S stainless steel construction for maximum durability.**
- **Limited Lifetime Warranty**
- **Moderate exterior performance sound with mild interior tone.**
- **Improves torque, horsepower and throttle response.**
- **Made in the USA**
