

Good news for early Impala owners! Flowmaster is proud to introduce our new 409S stainless steel header-back exhaust for 1959–1964 full-size Chevys. Featuring precise-fitting 2.50" mandrel bent pipes and carefully engineered hangers, this new stainless system features our limited lifetime warranty for long term peace of mind. The exhaust exits in front of each rear tire. Like all Flowmaster kits, clear step-by-step instructions are included for the do-it-yourselfer and professional alike. Offered without mufflers, this system accommodates a variety of 409S stainless Flowmasters, to tailor the sound to personal preference and complete a 100% stainless exhaust.

- **409S stainless steel construction for maximum durability.**
- **Limited Lifetime Warranty**
- **Mufflers not included.**
- **Instructions and all the necessary hardware included**
- **Made in the USA**
