

NEW PRODUCT RELEASE

Owners of the venerable 1987–1996 Ford F150 can relax. With the introduction of their newest 409S stainless exhaust system, Flowmaster has built the last exhaust you'll need to buy for your truck. Engineered for the life of the vehicle, this American Thunder system fits all wheelbases and gives the F150 a deep moderate tone inside and out, as well as improved performance and efficiency. As a true bolt-on, the kit includes a 3.0" inlet pipe with an extension for longer wheelbases, a Super 50 Series muffler and dual 2.5" mandrel-bent tailpipes which can be installed exiting behind each rear tire or straight out the back. Manufactured from American-made 409S stainless steel. This system comes with detailed step-by-step instructions, 3.0" polished T304 stainless steel Flowmaster-embossed tips and all necessary installation hardware. Like all Flowmaster stainless products, the system also carries a limited lifetime warranty for long term peace of mind.

- **409S stainless steel construction for maximum durability.**
- **Limited Lifetime Warranty**
- **Moderate exterior performance sound with mild interior tone.**
- **Improves torque, horsepower and throttle response.**
- **Made in the USA**
