

NEW PRODUCT RELEASE

Flowmaster introduces its brand new Force II system for 2008-2011 Ford F250 Super Duty trucks with gas engines including the new 6.2L V8. This system provides the perfect balance between delivery of increased power, torque and mileage. The fully mandrel bent system consists of a clamp-on adapter that connects after the catalytic converter mounting a Flowmaster 50HD Series single inlet, dual outlet muffler. The dual tailpipes feature large 3.00-inch tubing that route up and over the rear axle. Outlet extensions are included, so that the installer can choose between a dual-out-the-rear or dual-out-the-side configuration. To finish it off, 3.50-inch diameter polished 304 Stainless steel tips featuring the Flowmaster embossed logos are also included. The system includes all the necessary parts and hardware for a great fitting installation that can easily be done by the do-it-yourselfer. As a Force II system, it will typically produce a moderate exterior tone and a mild interior sound level. Constructed in durable 409S stainless steel, the system is covered by Flowmaster's Limited Lifetime warranty.

- **Stainless Steel Construction**
- **Large 3" Dual Tailpipes**
- **Choice of Side or Rear Tailpipe Exit**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**
