

Flowmaster is excited to announce big news for owners of 2005-2009 V6 powered Mustangs. To help unleash some of the hidden power, Flowmaster has engineered a complete cat-back, true dual system. Like all of Flowmaster's products this Force II system was developed on the dyno for maximum performance and efficiency and is fabricated entirely from 409S stainless steel. This exhaust offers a deep performance tone outside while maintaining a mild interior sound level. Featuring custom-engineered 60 Series Delta Flow mufflers, a Scavenger X-pipe assembly and 2.25" mandrel bent tubing and finished off with 3.5" polished T304 stainless steel tips along with all necessary hardware for a direct fit. While minor modification of the rear bumper is required (template included for the new tailpipe cutout), the system is a complete bolt-on for easy at-home or professional installation. Like all Flowmaster 409S stainless steel products the system carries a limited lifetime warranty.

- **Stainless Steel Construction**
- **Specially Designed Scavenger X-pipe**
- **60 Series Mufflers For a Classic Flowmaster Sound**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**

409S[®] Stainless Steel

FORCE II

SPECIFICATIONS:

UPC: 700042-02505-3

BOX DIMENSIONS:

12.00" H x 25.00" W x 52.00" L

WEIGHT:

85.00 lbs.

Part# 817510
