

With the introduction of the 2011 V6 Challenger, Dodge saw the need to provide 'true' dual exhaust on this economical muscle car. Flowmaster, after extensive testing and development has again improved on a factory offering with their new Force II system for these cars. Featuring dual 50 Series Delta Flow mufflers and 2.5" mandrel-bent tubing throughout, this exhaust incorporates Flowmaster's patented Scavenger X-pipe for increased performance and efficiency, as well as custom-engineered resonators in each tailpipe for a mild interior tone. The exterior sound level, while moderate, has a deep, distinct performance sound. As with all Flowmaster systems, high-quality hardware is included for easy at-home or professional installation while still retaining the factory rectangular tips. Proudly manufactured in the USA from American 409S stainless steel, the system is backed by Flowmaster's limited lifetime warranty.

- **409S Stainless for Maximum Durability**
- **Designed to use factory stainless tips.**
- **Tuned Tailpipe Resonators to Provide Minimal Interior Sound**
- **Premium Quality Band Clamps**
- **Utilizes all Factory Hanger Mounts/Locations**

**409S<sup>®</sup> Stainless Steel**

**FORCE II<sup>™</sup>**

**SPECIFICATIONS:**

UPC: 700042-02511-4

**BOX DIMENSIONS:**

17.25" H x 15.00" W x 52.50" L

**WEIGHT:**

69.00 lbs.

**Part# 817538**
