

Flowmaster is proud to introduce part number 817281, this new 409S stainless 2.50" dual Header-back exhaust for 1967-1970 Mustangs. Featuring the Super 44 Two Chamber mufflers, custom designed H-pipe assembly, mandral bent 2.50" tailpipes and finished off with 3.00" polished T304 stainless steel tips that exit through the factory valance. This American Thunder system gives your Mustang a powerful, aggressive tone inside and out, while delivering the performance and efficiency improvements Flowmaster is famous for. With 16 gauge 409S stainless steel construction and a complete stainless hardware package, Flowmaster has the last exhaust a classic Mustang will ever need, and like all Flowmaster stainless products, the 817281 is backed by a limited lifetime warranty.

- **Stainless Steel Construction**
- **Exits Through Rear Valance**
