

Flowmaster is proud to announce the latest addition to our growing line of durable 409S stainless exhaust systems. Part number 817278 is the Force II system developed for the 2000–2003 Dodge Dakota V8-powered trucks. Featuring a Super 50 Series muffler, this 3.00" single-tailpipe system exits behind the right rear tire with a polished 3.50" diameter stainless Flowmaster-embossed tip. Like all Flowmaster exhaust systems, this bolt-on application can be easily installed at home in an afternoon. With a mild interior tone and moderate exterior sound, this Force II system provides the horsepower and torque improvements you expect from Flowmaster, while remaining 50-state emissions legal. Included with the system is all necessary hardware along with detailed installation instructions. This exhaust is also covered by Flowmaster's limited lifetime warranty, making it the last exhaust your Dakota will need.

- **Stainless steel construction**
- **Mild to Moderate Exterior Exhaust Tone**
- **Easy bolt-on Installation**
- **Limited lifetime warranty**
- **Dyno Tuned For Maximum Performance**
