

Flowmaster proudly introduces our new all-stainless steel 2.50" dual exhaust system, part number 817174. Fabricated from 16 gauge 409S stainless, this Header-back American Thunder system features a moderate to aggressive tone inside and out. The system includes a pre-welded H-pipe assembly, 409S Super 40 Series mufflers, mandrel-bent pipes from front to rear, and is finished off with 3" logo embossed polished T304 stainless steel tips. This exhaust will be the last one you need to buy for your classic '55-'57 Coupe, sedan or hardtop Chevy (sorry, the system won't fit wagons or convertibles). To aid easy at-home or professional installation, the bolt-on system comes with all necessary hardware along with illustrated step-by-step instructions. Like all Flowmaster stainless products, this kit is covered by our limited lifetime warranty.

- **Mandrel Bent Tubing for Optimum Performance**
- **Steel Construction for Maximum Durability**
- **Lifetime Warranty**
- **Made in the USA**
- **409 Stainless**
