

Flowmaster is proud to introduce our American Thunder® dual exhaust system, part number 817104, for the '67-'74 Camaro/Firebird and '68-'74 Nova. Featuring our 80 Series® Crossflow muffler and mandrel-bent 2.50" tubing, this Header-back 409S® stainless system gives these classic muscle cars a moderate tone inside and out. The final sound level will depend on the degree of engine modification. Using the Crossflow design, this exhaust places the muffler in the factory location behind the rear axle retaining full ground clearance under the car, while offering all the performance benefits of a full 2.50" dual exhaust. Engineered for simple, at-home installation, the system comes complete with illustrated step-by-step instructions, all necessary hardware and, like all Flowmaster stainless products, it includes a limited lifetime warranty.

- **Stainless Steel Construction**
- **Exits under rear valance**
- **80 Series crossflow muffler for a classic Flowmaster sound.**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**

409S® Stainless Steel
