

NEW PRODUCT RELEASE

For owners of 1994–1997 Ford F250/F350 trucks, Flowmaster proudly introduces the last exhaust system your truck will need. Manufactured in the USA from 409S stainless steel, the 817211 Cat-back exhaust fits those trucks equipped with the 5.8L and 7.5L engines. Featuring the 70 Series Big Block II muffler, this Force II system gives the truck a mild sound inside and out, making it ideal for tow vehicles. Engineered for maximum performance and efficiency, this emissions-legal exhaust system features a single 3.00" mandrel-bent tailpipe, which exits in the stock location behind the right rear tire. A 3.50" polished, Flowmaster-embossed tip gives the truck a subtle performance look.

With detailed installation instructions and all necessary hardware, this exhaust is engineered for easy at-home or professional installation, and like all Flowmaster stainless products, is protected by a limited lifetime warranty.

- **Stainless Steel Construction**
- **Patented Delta Flow Technology**
- **Improved Towing Power**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**
