

**NEW PRODUCT RELEASE**

For owners of 2005–2007 Ford F250 and F350 trucks, Flowmaster introduces the last exhaust system these V8 and V10 powered vehicles will ever need. Part number 817422 is a 3.00" single-pipe, Force II system that features the 70 Series muffler for a mild exterior and interior tone. Perfect for trucks used for work or extended towing, this all-409S stainless system is engineered for maximum efficiency and performance gains, as well as a lifetime of durability. Fitting all wheel-bases, the system exits in the factory location behind the rear tire with a polished, Flowmaster-embossed stainless tip and comes complete with detailed installation instructions, all necessary hardware. Like all of Flowmasters stainless products, this system is backed by a Limited Lifetime warranty.

- **Stainless Steel Construction**
