

For owners of the 2007–2011 GM 2500HD and 3500HD Crew Cab/Short Bed trucks equipped with the 6.0 liter engine, the search is now over for a long lasting, high performance bolt-on exhaust system. Flowmaster's part number 817451 is an American-made, 409S stainless steel, direct fit system that bolts on to the truck behind the OE converter for 50-state emissions legality, as well as enhanced performance and efficiency. Featuring a 50 Series Big Block muffler for a moderate tone inside and out, this American Thunder system utilizes 3.50" mandrel bent piping throughout. The pipe exits behind the right rear tire with a 4.00" polished, Flowmaster-embossed stainless tip. The exhaust ships complete with all necessary hardware, as well as detailed instructions for easy at-home or professional installation, while Flowmaster's Limited Lifetime Warranty assures a quality product that will last a lifetime.

- **Stainless Steel Construction**
- **Deep, Performance Tone**
- **Patented Delta Flow Technology**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**

409S[®] Stainless Steel

FORCE II[™]
