

NEW PRODUCT RELEASE

For Nissan Titan owners looking for additional towing power with a subtle look, Flowmaster proudly introduces our new American Thunder system for the 2004–2010 5.6 liter Titan. Featuring our 70 Series Big Block II muffler, this 3.00" single tailpipe system fits all wheelbases except the crew cab long bed, and offers a moderate sound level inside and out. The system bolts directly to the truck's dual inlet pipes for a 50-state emissions legal installation. A 3.50" polished stainless tip gives the system a finished look. Manufactured entirely in the USA from heavy gauge 409S stainless steel, this system includes detailed instructions and a complete hardware package for easy at-home or professional installation, and as with all Flowmaster stainless exhaust systems, our limited lifetime warranty assures long term durability.

- **Stainless Steel Construction**
- **Deep, Performance Tone**
- **Patented Flowmaster Technology**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**

409S[®] Stainless Steel
