

As part of a growing line of stainless steel sport compact exhaust systems, Flowmaster is proud to introduce our dBX Axle-back exhaust for the 2005–2010 Scion TC. Featuring the dBX muffler and fully mandrel-bent 2.50" pipe, this 409S stainless bolt-on system provides a moderate sound inside and out, while a 4.00" diameter polished T304 stainless steel Flowmaster-embossed tip provides a performance look to the vehicle. Detailed, step-by-step instructions make the system easy to install either at home or by a professional. For added longevity, the exhaust is covered by a limited lifetime warranty.

- **Stainless Steel Construction**
- **Easy Bolt-on Installation**
