

NEW PRODUCT RELEASE

To help increase the towing power and efficiency of Ford's 2008-2010 F250 and F350 trucks, Flowmaster is proud to introduce part number 817446. This 409S stainless steel Force II system fits both the V8 and V10 powered trucks in all wheel bases and features 3.00" mandrel-bent tubing throughout. 50-state emissions legality is assured with a direct fit behind the OE catalytic converter and the 50 Series HD muffler provides a moderate tone outside, with a mild interior sound level. A 3.00" tailpipe with its 3.50" polished, embossed tip exits behind the right rear tire for a subtle performance look. Manufactured entirely in the USA, this exhaust will be the last system your Ford will ever need, and like all Flowmaster stainless steel products, a limited lifetime warranty protects your investment for as long as you own your truck.

- **Stainless Steel Construction**
- **Includes Hardware**
- **Great Fit**
- **Limited Lifetime Warranty**
- **Mandrel Bent**
