

For owners of GM's 2000–2006 Tahoe and Yukon, the choice for the ideal performance exhaust just got easier. Flowmaster proudly introduces part number 817344, a 409S stainless steel bolt-on exhaust system for vehicles equipped with the 4.8 or 5.3 liter V8 engines. Featuring a 50 Series Big Block muffler, this 3.00" mandrel-bent, single-tailpipe Force II system bolts directly behind the factory converter and provides a moderate exterior and mild interior sound for these popular SUVs while increasing horsepower and torque for greater efficiency. The tailpipe exits behind the right rear tire and is finished with a 3.50" polished, Flowmaster-embossed stainless tip. Manufactured entirely in the USA, the 817344 comes complete with detailed installation instructions, all necessary hardware, and Flowmaster's Limited Lifetime Warranty for long term quality assurance.

- **Stainless Steel Construction**
- **Big block muffler for a quiet interior.**
- **Mandrel Bent Tubing**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**
