

For owners of Chevy's classic 1968-1974 Nova, Flowmaster introduces our newest 409S stainless exhaust system. Part number 817158 is a header-back dual 2.50" mandrel-bent American Thunder exhaust engineered specifically for the Nova, featuring our popular Super 44 mufflers, a welded H-Pipe assembly and 2.50" tailpipes which exit under the quarter panels with turn-down pipes for a factory look. With a moderate to aggressive tone inside and out, this system provides the performance gains you expect from Flowmaster, while the all-409S stainless construction means this will be the last exhaust your Nova will ever need. Included with the system are detailed, step-by-step instructions and all necessary hardware for easy at-home or professional installation, and our Limited Lifetime Warranty provides long term assurance of product quality.

- **Stainless Steel Construction**
- **Patented Flowmaster Technology**
- **Direct Fit**
- **Limited Lifetime Warranty**
- **Dyno Tuned For Maximum Performance**
