

**NEW PRODUCT RELEASE**

For owners of the 2011 Ford F150 equipped with the exciting new EcoBoost turbo V6, Flowmaster introduces our new Force II system, part number 817539. Carefully engineered on the vehicle, this direct-fit, bolt-on exhaust fits all wheelbases and features a custom-engineered Pro Series muffler developed specifically for this system. With a 3.00" inlet, the exhaust bolts directly onto the truck, while dual 2.50" tailpipes can be routed directly out the back, or out behind each rear tire. Polished, 3.00" Flowmaster-embossed tips finish the look with either option.

As a Force II system, the 817539 provides a mild interior sound level with a deep, moderate exterior sound, as well as the performance and mileage gains you expect from Flowmaster. As with all Flowmaster exhaust systems, the EcoBoost system comes complete with detailed instructions and all necessary hardware for easy installation and our Limited Lifetime Warranty assures a lifetime of worry-free driving.
