

**NEW PRODUCT RELEASE**

Owners of 2001-2006 GMC and Chevy 2500HD and 3500HD trucks equipped with the Duramax turbo diesel engine have a new choice in exhaust. Flowmaster proudly introduces part number 817542, our new 409S stainless steel Force II exhaust system. Bolting onto the OE down pipe, this system features 4.00" mandrel-bent piping throughout for maximum performance gains and efficiency, while the Pro Series muffler provides a moderate exterior sound with mild interior tones. As a direct bolt-on system, the 817542 uses the OE hangers, and exits behind the right rear tire. The system is finished with a full 5.00" diameter polished, Flowmaster-embossed 304 stainless tip. Detailed installation instructions and all necessary hardware make the system an easy at-home or professional job, and the Limited Lifetime Warranty means this is the last exhaust the Duramax will ever need.
