

The 2011 Dodge Charger, with its bold, new styling, deserves a performance exhaust system that lives up to its image. Flowmaster is proud to introduce that product. Part number 817543 is our new 409S stainless steel Force II dual Cat-back system, engineered specifically for the 2011 V6 Charger. Featuring our patented Scavenger X-pipe and mandrel-bent 2.50" pipes throughout for maximum performance, this system uses our 50 Series Delta Flow mufflers for a moderate tone outside and a mild interior sound level, as well as the horsepower, torque and efficiency gains you expect from Flowmaster. Brushed stainless tips exit inside the OE bezels for a subtle look. Installation of this 50-state emissions legal system is made simple with detailed instructions, and includes all necessary hardware for the at-home or professional installer. As with all Flowmaster stainless exhaust systems, our Limited Lifetime Warranty provides long term quality assurance.

- **409S Stainless for Maximum Durability**
