

For owners of Ford's 1998-2011 4.0 liter Ranger trucks with extended cab short beds. Flowmaster proudly introduces our new dBX Cat-back system, part number 817545. Featuring our dBX muffler, with its patented Laminar Flow technology, this 50-state emissions legal system bolts directly behind the factory emissions equipment, and gives the truck a deep, aggressive exterior tone and a moderate interior sound, along with the horsepower, torque and mileage gains you expect from Flowmaster.

Engineered for maximum efficiency, the mandrel-bent 2.50" single pipe system exits the truck behind the right rear tire with a polished, 3.00" Flowmaster-embossed tip, and includes all necessary installation hardware, as well as fully detailed instructions. Our Limited Lifetime Warranty provides assurance that this will be the last exhaust system your Ranger will ever need.

Please call 1-800-544-4761 or visit www.flowmastermufflers.com for more information.
