

Flowmaster proudly introduces our new 409S stainless steel Universal Scavenger X-Pipe kit for the at-home or professional fabricator. Designed to mount before the mufflers on dual-exhaust vehicles, this 2.50" system with its patented Scavenger D-Port technology can provide significantly improved torque over typical H- and X-pipe designs, while helping maintain the classic Flowmaster sound when used with any Flowmaster mufflers. Combined with various direct-fit or universal tailpipe kits also available from Flowmaster, the Scavenger X-Pipe allows complete custom exhaust fabrication for any vehicle, while the Limited Lifetime Warranty provides long term quality assurance.

- **Stainless Steel Construction**
- **D-Port Technology**
- **Great Fit**
- **Limited Lifetime Warranty**
- **Mandrel Bent**
