

COMP Cams® Camshaft Degree Kit for GM Gen III/IV LS Engines

New Camshaft Degree Kit for LS Engines includes everything you need to degree your LS Gen III/IV camshaft in one convenient package

The Camshaft Degree Kit for GM Gen III/IV LS Engines from COMP Cams® contains all the tools and fixtures necessary to precisely set camshaft timing in order to make up for engine machining tolerances. Degreeing positions the camshaft to get the best performance out of your engine, so that you can get the most horsepower and torque possible from your application.

This degree kit ships with everything required to degree a camshaft when the cylinder heads are either on or off the engine, including a 9" degree wheel, wire degree wheel pointer, heads off cam checking fixture, 0-1" travel dial indicator, 5" dial indicator extension, LS-specific threaded stands, LS-type crankshaft socket, plate-style top dead center (TDC) stop and instructions. Your investment is kept safe and secure in the included foam-padded carrying case.
