

## COMP Cams® LS Engine Valve Spring Kits

**COMP Cams® now packages everything you need to install new LS Engine High Performance Valve Springs in one easy kit**

The new LS Engine Valve Spring Kits include carefully matched Beehive™ or Street/Strip Dual Valve Springs, retainers, locks, seals and spring seats – everything necessary for better valve control to handle higher rpm and more aggressive cam profiles.

LS Engine Beehive™ Valve Spring Kits were designed for hydraulic roller cams and are available in six different combinations: three sets contain COMP® #26915 valve springs and are available with Chromemoly Steel, Lightweight Tool Steel or Titanium retainers; and three sets include COMP® #26918 Beehive Valve Springs™ with the same three retainer material choices. Kits that include the #26915 Beehive Valve Spring™ have a maximum lift of .575" while the kits containing the #26918 Beehive Valve Springs™ have a maximum lift of .600".

Four Street/Strip Dual Valve Spring Kits are available for hydraulic roller and some solid roller cams: two sets that contain COMP® #26925 springs and your choice of Lightweight Tool Steel or Titanium retainers and two sets that contain COMP® #26926 Valve Springs with the same retainer options. Kits containing #26925 Valve Springs have a maximum lift of .650" while #26926 kits have .675" maximum lift.

With 10 different options available, you can easily match the appropriate springs for your LS application. And no matter which kit you choose, all springs use cutting edge design for added durability and performance in your application.
