

COMP Cams® Trucker Style Hat

Be part of the winning team with the new signature trucker hat from COMP Cams®

COMP Cams®, the absolute leader in valve train technology, is offering customers and supporters the chance to be part of the valve train performance team. With the company's new signature trucker style hat, racers and performance enthusiasts can show support for the company whose winning valve train combinations have helped them outrun the competition for years.

The COMP Cams® Trucker Hat is designed from a black twill material with gray stitching and gray mesh material on the back. The hat itself is great for the hard-working racer, engine builder or performance enthusiast to wear at the track or in the shop because the black twill material won't show any signs of dirt or grease stains.

With an adjustable back strap that sports the company website, www.compcams.com, the hat is one-size-fits-all. The front contains the full COMP Cams® embroidered logo. Trucker style hats have been popular for years, yet often have issues with fitment. Here's your chance to get one that's worth buying.

Show your loyalty to the brand that has contributed to the success of your racer car or street rod engine. For more information about the COMP Cams® Trucker Hat or any other COMP Cams® product, call us toll free at 1-800-999-0853, or visit us online at www.compcams.com.
