

FAST™ XFI™ Fuel Injection Training Course Open For Enrollment

FAST™ teams up with EFI University to create new training course in fuel injection technology specific to the popular XFI™ Fuel Injection

FAST™ and EFI University of Temecula, California, have joined together to hold a series of special, one day training courses covering the fundamentals of setting up and tuning with the FAST™ XFI™ Fuel Injection System.

The courses will be taught by accomplished EFI instructor and author Ben Strader; racer and tuning guru Brian Macy; and members of the FAST™ technical support staff. Designed for seasoned tuners and first timers alike, the courses will take an in-depth look at everything from phasing the distributor to gaining an advantage at the track with the XFI™ optional Intelligent Traction Control™ feature.

There are four classes planned for 2010 with the first taking place on May 8th at the COMP Performance Group™ R&D facility in Memphis, TN, and the second on June 26th at Westech Performance in Mira Loma, CA. The dates and locations for classes three and four have yet to be determined but they will be announced on the FAST™ website at www.fuelairspark.com/training. Registration for any of the classes can also be handled via the FAST™ website, along with class details.

“The technical foundation I received from the EFI 101 course and the EFI Advanced course was the basis for my success in our technical and sales department. This is why I’m so excited about what the XFI Fuel Injection Training Course will offer XFI installers and tuners.”

– David Page, COMP Cams® and FAST™ Performance Account Manager

There is a registration fee of \$495.00 with each class limited to no more than twenty-five people. In addition to the knowledge gained and certificate of accomplishment earned, attendees will also make personal contacts with FAST™ technicians and engineers for follow-up support.

For more information about the FAST™ XFI™ Fuel Injection Training Course or any FAST™ product, call us at 1-877-334-8355, or visit us online at www.fuelairspark.com. To register, visit www.fuelairspark.com/training.
