

FAST™ XFI™ Fuel Injection Training Course Is A Big Hit With Professionals And Amateurs Alike

Engine tuners from all over the country gathered in Memphis, Tennessee, on May 8th for the first XFI™ Training Class

The first of four scheduled 2010 XFI™ Training Classes held by FAST™ and EFI University of Temecula, California, was a huge success. The sold-out, one-day event covered basic and advanced techniques for setting up and tuning the FAST™ XFI™ Fuel Injection System. Over the course of the day, students were given an in-depth look at everything from phasing the distributor to gaining an advantage at the track with the optional XFI™ Intelligent Traction Control™ feature.

The class's open format allowed for plenty of questions and lots of time for discussions in which everyone could take part. From seasoned engine builders to tuning novices, every student learned something new. The course was taught by accomplished EFI instructor, racer and tuning guru Brian Macy and the FAST™ technical support staff.

“When I heard FAST was offering a class on their system with EFI University, I jumped at the chance to go. As an amateur, I expected the class to be over my head. Even though most of the people there were professional tuners and racers, I found the instructors presented the material in a very understandable manner. I came away from the class with a high degree of confidence that I understood the XFI™ system. I would highly recommend this class to anyone – amateur or professional. This is an excellent class.” –Cliff Lawrence

In addition to the priceless information gained, everyone who attended received a free goodie bag with a FAST™ shirt, a copy of the course materials and other giveaways. Every student was also entered in a raffle for two special prizes. Pete Tyer won an Analog Wide-Band Air/Fuel Gauge Kit, and Richard Egge walked away with a Digital Gasoline Air/Fuel Meter.

The next FAST™ XFI™ Fuel Injection Training Course will be held at Westech Performance in Mira Loma, California, on June 26th. The Memphis class sold out early, and the Mira Loma one is filling up quickly, too. Reserve your place today if you want to attend. Registration is \$495.00, but time is running out and space is limited.

In addition to the June 26th Westech event, there will also be a special, media-only class on Friday, June 25th also held at the Mira Loma facility. Interested media members should contact Ashley Ledlow at 901-795-2400 ext. 729 to check on availability.
