

Tomar Racing Clutches Joins Quarter Master[®]

Quarter Master[®] acquires industry leading racing kart & motorcycle clutch manufacturer

Quarter Master[®] and Marvin Justus are proud to announce that Tomar Racing Clutches has now become part of the Quarter Master[®] family. Tomar Racing Clutches by Quarter Master[®], as the brand will now be labeled, is a well known leader in the oval and sprint karting market, as well as the MX motorcycle market. The California-based company founded by Justus has enjoyed a history of track-proven, race-winning results with 2- and 4-cycle, wet and dry design kart clutches, as well as motocross racing wet design clutches.

Quarter Master[®] has already begun to take the cutting-edge technology and vast experience that has made it the most trusted name in automotive driveline performance and apply it to the Tomar product line. With the latest CAD, 3D modeling and FEA technology, the experienced staffs of both companies believe Tomar will significantly increase its market share.

“We are extremely pleased and excited that Tomar and Marvin Justus are joining the Quarter Master[®] family,” stated Jeff Neal, Quarter Master[®] General Manager. “We believe the fit with our company could not be better. Tomar shares our mission to be an industry leader with a product that provides racers with what they need most – exceptional on-track performance. We look forward to working together in order to grow and expand both companies.”

The new association will provide for even stronger racer support programs and quick turnaround clutch rebuild/repair services. The new Tomar will offer personalized, one-on-one service and technical support direct to racers as well as via an established dealer network. This acquisition will allow a racer to start his or her career with Quarter Master[®] products in karting or MX motorcycles and continue to use the products as they progress up the racing ladder. Along with its full line of motocross and kart clutches, Tomar will also bring a variety of ancillary products such as tools, installation kits, gear sprockets and other accessories.

“I am very excited about this new chapter in Tomar’s history,” said Tomar founder, Marvin Justus. “Moving forward, we expect Tomar and Quarter Master[®] to expand their combined engineering resources, allowing both companies to bring innovative, racer-friendly products to their respective markets at a rapid pace. We look forward to building on the winning history of both companies, and I couldn’t be happier about becoming part of Quarter Master[®] and the COMP Performance Group[™] family.”

Tomar Racing Clutches by Quarter Master[®] will operate out of the Lake Zurich, IL, headquarters of Quarter Master[®], effectively immediately. New website and promotional materials are forthcoming.
