

TCI® To Sponsor 2010 Car Craft Summer Nationals Burnout Contest

TCI® supports hot rodders with popular Burnout Contest at Car Craft Summer Nationals

TCI® will be sponsoring the popular 2010 Car Craft Summer Nationals Burnout Contest on July 16-18 at the Minnesota State Fairgrounds in St. Paul, MN. The contest is a two day event in and of itself with a crowd of 15,000 muscle car lovers watching contestants create huge clouds of smoke and lay down thick layers of burnt rubber. In addition to the smoking burnouts and the over 4,000 cars on display at the Car Craft Summer Nationals, the COMP Performance Group™ trailer will be on-site with full-size displays, literature and apparel while technicians for all CPG companies will be on-hand to answer questions.

It's fitting that TCI® sponsors the Burnout Contest as the drivetrain leader has recently expanded its line of Burn-Out (Roll Stop®) Kits, including a kit for the 2010 Camaro with more applications on the way. If you're looking for a monster burnout, a TCI® RollStop® provides the extra control you need. When installed in-line with the vehicle's front brakes, the RollStop® allows the front wheels to lock, helping to hold the car in the staging beams and the burnout box.

The TCI® RollStops® are waterproof and manufactured from 6061-T6 aluminum for high strength and durability. The precision solenoid valve can withstand up to 3,000 psi of pressure and is designed to draw only one amp of current. RollStop® Kits are easy to use and come with everything needed for a quick, two hour installation.
