ZEX™ Adjustable Nitrous Bottle Heater Delivers Ultimate Performance

Want your nitrous system to deliver the best performance possible? Heat it up with the new ZEX™ Adjustable Nitrous Bottle Heater. Performance enthusiasts know that heating your nitrous bottle to achieve 900-1000psi is the key to ultimate nitrous system performance. To achieve this, the ZEX™ heater features a fully adjustable, precision pressure control switch. This not only lets you tune bottle pressure to your liking, but having the heater controlled by a pressure switch results in the most consistent and reliable way to maintain race winning nitrous horsepower.

In addition to the adjustability and precision of the ZEX™ bottle heater's design, the kit also features an industry leading 240 watt heater element. This high power element warms up cold bottles in just minutes and gives you the heating power needed to properly maintain consistent nitrous pressure under all racing conditions.

For more information about the new ZEX™ Adjustable Nitrous Bottle Heater or other ZEX™ products, please contact ZEX™ at 1-888-817-1008 or go online to www.zex.com.

Quick Summary

Product: ZEX™ Adjustable Nitrous Bottle Heater

Part Number: #82369

Features & Benefits:

- Fully adjustable from 400-1100psi
- Pressure controlled for maximum reliability and precision
- Industry leading 240 watt heater element for fast bottle heat-up
- Fits any manufacturer's nitrous system using -4AN feed lines
- Easy one hour installation
